

# Green Corporate Power Purchase Agreements

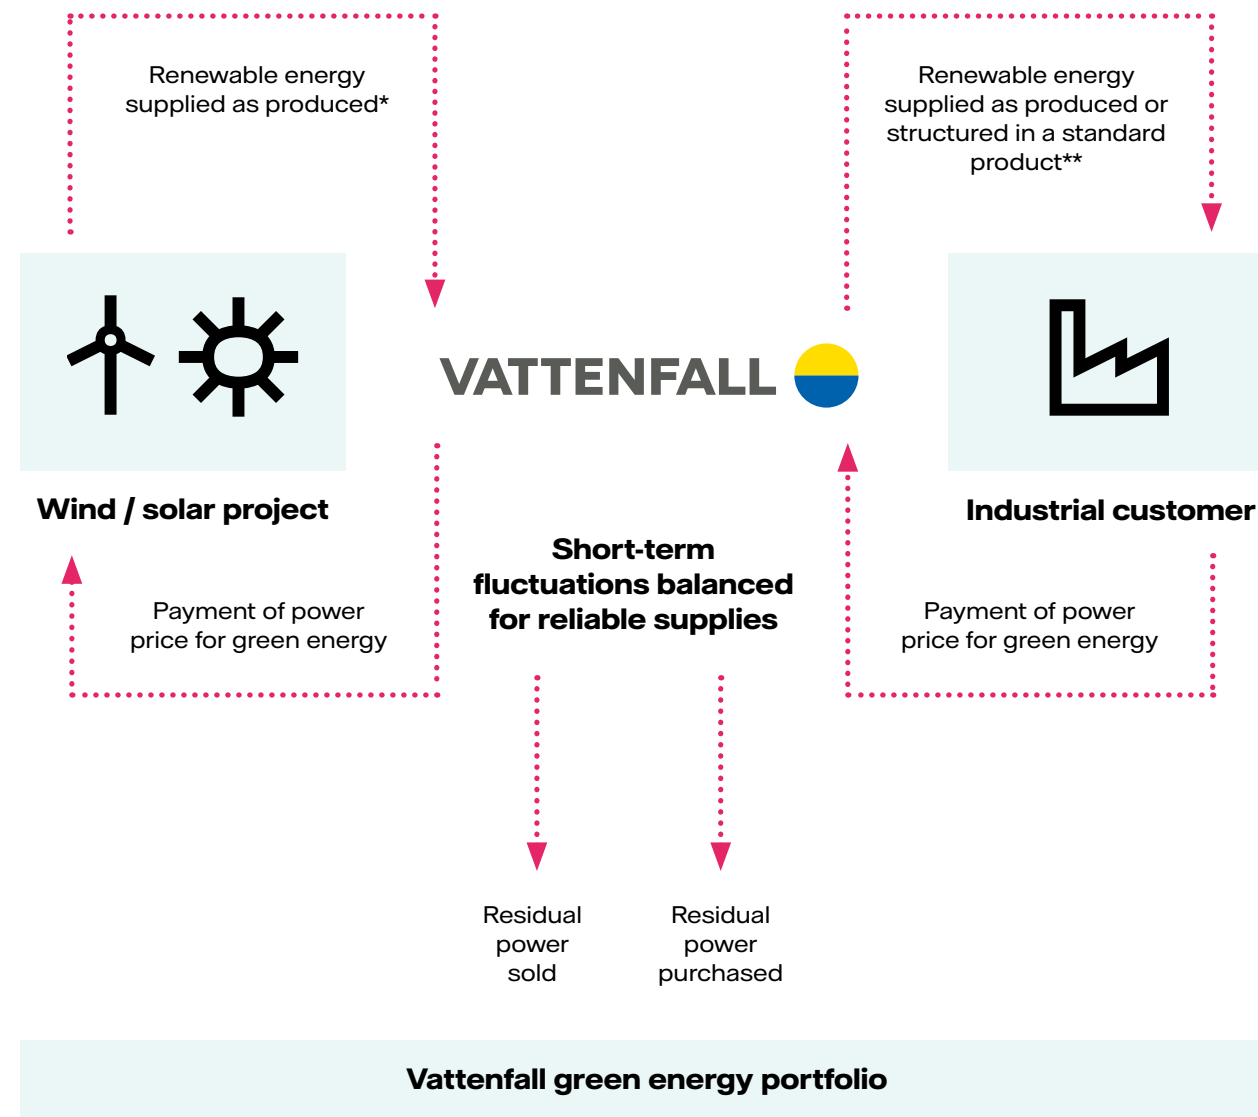

The way to increase sustainability for  
your company

**VATTENFALL**

# Sustainability through Green Corporate PPAs

Reduce your company's carbon footprint while enjoying the benefits of long-term planning security: **Green Corporate Power Purchase Agreements (Green Corporate PPAs)** are the future of renewable energy supply for industrial customer. Source your green power linked to the renewable asset and plan with fixed commercial conditions.

\* Vattenfall handles processing, incl. marketing risks, balancing group management and market communication  
 \*\* Vattenfall handles processing, incl. supply in the balancing group, supplier role, forecasting and structuring/balancing of the volatile profile of wind or solar energy

## Green Corporate PPAs in Germany

There is a huge trend towards Green Corporate PPAs in Germany. The trend could represent a revolution of the renewable energy subsidy scheme. Industrial customers now have the opportunity to become long-term partners of wind and solar energy projects and thereby make a measurable contribution to climate protection without having to invest directly.

## Who benefits from it?

Green Corporate PPAs are especially interesting for industrial and commercial enterprises, municipal utilities and distributors. Furthermore for consumers, who want to realise a verifiable electricity consumption from renewable energy plants.

## How it works

**1.**

You choose your quantity and profile. We deliver the desired quantity as produced or structure it into a standard product.

**2.**

We supply renewable electricity directly to you from one of our wind or solar projects, or one of our partners' - completely independent of renewable subsidies.

**3.**

Our fixed prices apply for up to ten years, enabling long-term planning for you and your company.

**Contact us.  
 We will be happy to get in touch with you!**

**We can certify your power supply by Guarantees of Origins (GoOs) and prove its renewable sources.**

# A strong partner at your side

## Net-zero emissions by 2040

Vattenfall considers it a responsibility to expand our climate-friendly supply to households, industrial companies and cities. We focus our efforts on **enabling and encouraging the development of climate-conscious lifestyles.**

We want to be a leader in sustainable generation and guarantee a reliable and cost-effective energy supply. As a result, we are one of the market leaders both in onshore and offshore wind power. We have also been able to significantly reduce our CO<sub>2</sub> emissions over the past years. And we are continuously pursuing our efforts: by 2040, Vattenfall aims to reach net-zero emissions.

Million tons of CO<sub>2</sub> emissions
